

CONFERENCE HASHTAG  #SRAevents

'Social Research in a Sceptical Age'

Wednesday 6 December 2017 at the British Library, London

The current climate of scepticism towards 'experts' has put many research practitioners and users on the defensive. Is it enough simply to assert the value of rigorous methods, or should we be checking, sharpening and improving our tools? If 'post-truth' carries real meaning then the pressure is on researchers to find a positive response – such as clearly communicating our findings and why they matter; and demonstrating how high standards in design, conduct and analysis are built in to our research.

The SRA annual conference is the only forum the UK has for bringing together social researchers from all sectors and disciplines to share knowledge and ideas, to debate our most pressing professional issues, and, of course, to meet and talk.
